Broken Ties.

The broken ties or happier days, How often do they seem ... To come befure our mental gaze, Like a remembered dream; Around us each dissevered chain In sparkling rain lies; And earthly hand can no'er again Unite those broken ties.

The parents of our youthful home; The kindred that we loved, white Far from our arms perchance may roam, To desert seas removed. Or we have watched their patting breath, And closed their weary eyes, And sighed to think how sadly death Can sever burnan ties.

The friends, the loved ones of our youth, They, too; are gone or changed : Or, worse than all, their love and truth Are darkened or estranged They meet us in the glittering throng, With cold, averted eyes, And wonder that we weep their wrong,

O! who in such a world as this, Could Lear their lot of pain. Did not one radient hope of blisa Unclouded yet remain ? That hope the sovereign Lord has given, Who ruigns above the skies. House that unite our souls to heaven,

And mourn our broken ties.

By faith's endearing ties. Each care, each ill of mortal birth, To life the lingering heart from earth, And speed its flight above, And every pang that wrings the breast, And every joy that dies, Tell us to seek a purer rest, And trust to holler ties.

### Newmarket Council.

The above Council met at the Court House on Monday evening last - Mesars. Surberland, Roe, Bache and Davison being present. The first thing brought before the Council

was an account of labor performed under and by Mr. A. Coryell, on the roads, bridges and side walks, amounting in all to \$238:22 cts. After some little discussion about informal-

ily, on motion of Mr. Roe, seconded by Mr. Darison, the amount was ordered to be paid.

Mr. Darison then said, that Mr. Harder the contractor for laying side-walks, was maiting for lumber, and had been waiting for two weeks. He now wanted a portion of his pay in order to discharge some liabilities incurred.

Mr. Bache said-the work ought to be ex; amined and accepted, before money was paid

### Ways and Means,

Whatever may be the disposition of other men, we very much distike to be compelled to say anything against the acts of our local authorities; but the Report we publish elsewhere to day from the Finance and Assess. ment Committee, and remarks that fell from members of the Council thereon, is deserving of a passing notice. While the Committee sent him home. After this, the play was cau. should have been engaged. By this means make two propositions regarding the manner of raising the Assessment necessary, they displenty of hunting and fishing in the vicinity, tinetly recommend the adoption of a course contrary to law. For several reasons : first, if the Council have power to levy statute labor, according to their first proposition, they must appoint path-masters and allow all who have a mind so to do, to scork out their time. This will appear evident, when the fact is taken inschool, mentioned in last Friday's Era, and to consideration that no Township can comnel the commutation of statute labor unless a majority of the rate-payers petition the Coun-

Here is only a difference of

\$13:50cts ,- that's all. Agrio, another reason why Statute Labor should not be thought of in incorporated villages is-the Council are supposed to deal with the yearly falue alone, as indicated by the Assessment Roll: how they can in the one case deal with the actual falue, and then in another with uto as the basis to act upon, we find that One the yearly or annual value, it is difficult for us to comprehend, we must confess, for the Municipal Act, Incorporating Villages, distinctly states the powers of a Village Council-what improvements then can make, and how the amount necessary to pay for the same must be raised - riz: " by means of a rate or rates to be assessed equally on the whole ratable property of the Village." From the beginning, we bare opposed bren the use of the term Statate Labor, because we believed the Act never contemplated any such thing. If the Council want £100 or £150, beside the license fees, for improvements, let them lery the amount upon the ratable property,-then every rate-payer will bear his due proportion. If they want one shilling in the £, to pay expenses the man assessed at three hundred pounds actual value or eighteen pounds yearly value, will have eighteen shillings to pay towards. Village improvements; and the man taxed ten times that amount, will have ten times the same to pay all stand upon an equal footing. We bare perhaps taken up more of our

space with this matter than we ought; but if we can only lead our local authorities to consider their true position, look the question fair in the face, and treat it accordingly, we shall consider ourselves well paid, and the bard working man benefitted. We were glad to perceive that scarcely a Councilman present Mr. Bache said he could not see bow it appeared in favor of the first proposition could make ony difference; and if we lery a laid down in the Report : and the Reeve statrate, it would only be raising so much money. ed the only object, " in introducing the two There was no difference between calling it ideas, was to bring the matter before Council." We do not find fault with bringing the able property. However, he was in favor of subject before the Council; but we do think lerying and collecting a rate upon the taxable the Committee somewhat consurable for " recommending" the first proposition, particular ly when they did not require the amount such a course would raise, by above \$300.

What we have said on this subject, has been written with a good intent; and although some people may think it time enough to " give an opinion when asked," we act upon the princiorder upon the Treasurer for the payment of ple that there is no use in locking the door after the borse is taken away. #### Temperance Lecture.

On Friday evening last, the well-known and able Temperance Lecturer, Mr. Moffat, delivered an excellent and deeply interesting address in the Union S. S. Room, on the subject of Prohibition. The Chair was occupied by P. Pearson Esq., and although when the lecturer commenced the audience was small; yet shortly after, the house was filled, reasonably full. Mr. Moffat is a man Head, came off on the Landing Ground on ulty of telling an anecdote in admirable fine Tuesday last, - and will long be remembered, style and with good effect. His address last Friday evening was argumentative, illustrative, and, part of the time, deeply affective. Clergy Reserve Money.

DEAR SIR,-A public meeting of the inhabitants of Newmarket will soon be called to decide whether the appropriation of the Cler-Now, the people have not petitioned, neith. causing the countenances of the South men to | gy Reserve Fund, now in the hands and due the Municipality of this Village, shall be devoted to educational purposes or otherwise. In view of the importance of the steps to be taken by that meeting, I take the liberty of making a few remarks.

As a community we have ever held that the natural happiness and prosperity of our country has intimately connected with its educathe disposal of the Government, we strenuousin the £ upon the ratable properly aball be their opponents 104 to get, in order to come ly advocated its application to this purpose and telie our past professions, by allowing the money to be applied to the purchasing of a fireengine, for the purpose of improving of roads, bridges, or for any purpose other than educational ! Such a decision would not only be a lasting disgrace but would justify the charges of insincerity so often made by our opponents, If then, we are sincere, let us act vigorously -for under a little free batting the bowling and wisely for ourselves on this occasion. Let us beware of the spirit of jobbery and corruption, which prevails so alarmingly la pearly every Municipality in the country, and remove at once all temptations from the paths of our own. Let us be warned in time, and squandered and frittered away.

If then the decision of that meeting is to place this fund in the hands of Trustees for educational purposes, how will they be directed to dispose of it? This is important. doubt various plans will be proposed : one, I believe, will be to invest this large sum of money and apply the interest only to educational purposes, with a view at some future period of applying the whole to the construcof high school, for the use and benefit of those who desire to be instructed in the higher branches of education.

This scheme is too vague, too uncertain, and manifestly too unjust to be entertained for an iustant. The fate of the fund would be too Where would it be in ten years !certainly not elevated to the grand purpose for which it is intended; and granting that it was, are we'to neglect the wants of our own mote posterity? No honest, industrious, and welfare neglected. The poorest man in this community has as much right to the benefits to imagine that the chicanery, bedantry and of the fund as the wealthiest merchant in the sloth, which exist to such an alterning extent to be story. place. But to take another view of the question; I tion is in guard against such ovils? Is he not the inestimable benefits conferred on the com- awareof the generally admitted fact that Educa-17 munity by the Common School System command our attention. I suppose few will deay 64 that this system has conferred great blessings upon the country. Education is not now confined to the upper classes. The poorest man 73 | can send his children to the Common Schools. and so excellent is the system of instruction, that the very wealthiest is but too glad to avail himself of the opportunity of sending his children also. We have felt the advantages in our ann Common School here; but only, partially. We have but one school in which males and females are indiscriminately huddled | because the craft' deny their comordence with together to the absence of (it is to be regret- the extraordinarily liberal standard of accomted) that proper refinement and delicacy which parents do and should desire. What is the consequence? That there are many parents who are obliged to send their girls to private schools, and loose a far superfor education be- Fulstaff himself, elve he would not be so splencause they cannot consent to their acquiring elio, or maybe, he's some sour, bachelor that rude and indelicate habits from an every day no pretty girl will smile on, and hence he vents association with rough boys. There are now attending these private schools nearly sixty children who would be added to the number of those taught by this kystem if a separate female common school was established and a first-class teacher employed. I now recommend to the inhabitants of

Newmarket, a far wiser, and in my opinion, juster course of action than that of investing this money for an indefinite purpose. I propose to use it at once, or at least as soon as it is at the disposal of our Municipality, and for the benefit - not of our grand children alone -but for our own offspring already in existence. If necessary let a plot of ground be purchased, and a good substantial school-house be built for lemales alone out of this fund, and then we may employ a first-class female teach er, and this without a farthing extra expenditure. This may see u bad logic to some, but it is easily proved to be true. The sixty children attending private schools

and many who are not attending school at all, will undoubtedly attend under the new arrangement; parents will only too willingly exchange the method of teaching of the last century for that of the present age, as taught at the Normal School, the completeness and thorough successful aspirants for slothful luxury or notoexcellence of which can alone be appreciated by those who have seen its practical workings under favorable eircumstances. For these pupils the Government allowance will be over \$100, which, together with fuition from the pupils themselves, will amount to at least \$300, add this to the amount paul to the secoul class teacher, in our lower school \$160, and you have \$160, a sum more than sufficient to employ a first-class female teacher. This sum, as well as the advantages derived from the superior instruction of such a teacher we are actually losing each year. Are we not doing that which is morally wrong ! And shall we not be answerable to our children at a future day, if we allow this neglect to continue l

Carried away by my enthusiasm, I have already trespassed too lengthily on your valua. ble space, but I am sure you will forgive the offence in consideration of the cause. I desire to warn every inhabitant of Newmarket, the pour as well as the rich, but especially the former, to attend this meeting, and attend prepared to assert his rights. Let cuch man be on his guard; let him suspect every proposition which is not clear and definite. In one or two years a separate female school and firstclass teacher will be absolutely required, and loud will be the complaints when we are taxed for the erection of a School House and the other attendant expenses if we have neglected the present opportunity and allowed a large sum of money to be turned from its moral and righteons purpose. I call on every honest man to attend this meeting with a strong earnest purpose, and I warn him that if this Clergy Reserve money is not at once applied to a plain honest object like that I have endeavored to advocate it will be frittered and squandered away for God knows what. Let all be warned by the example of the present government and beware how they encourage their own municipal institutions to follow their ex-

DEAR Sin,-It appears from most reliable information that seventeen well-fledged and well-fed geese betwee themselves on an

equatic excursion on the mighty waters that flow around this rising Town. After en joying themselves for a while, they had the nudacity to place their webbed feet on the socred soil of the Reeve, to flan their wings before his honor's residence: It may be observed, the ground they trod would not graze a decent goose: however, such evils were not to be borne, and forthwith the adminis trator of law commenced an attack upon the whole family of mother goose; ofte. making them prisoners, proceeded to drive the plunder, unassisted by any officer of the law, to durance vile. Well, after toiling and laboring for a longth of time, he finally succeeded in safely incorcerating them in a But chers stall—at least so report says. What fearless gallant and noble housewife he would make! but the grossest part of the farce is that he claims from the owner the sum o sixteen shillings and threepence; otherwise the flock of the feathered tribe must be sold according to law. Whatever others ma think, I am of the opinion that the Reave might employ his time better.

To the Editor of the New Bra. Mr. Eutron,- Please allow me to tell the

Brethren in your County that the cause is flourishing in many sections of Canada East Although as yet there are only 30 Divisions of our Order in Lower Canada, you the work is steadily progressing, and it is to be hoped transferring to our columns :--that in due time the " little one will become a thousand." The cause in the City of Quehec, where I lectured twice last week, is flourishing. There are three Divisions it leading Tomperance men gave me a most cordial and Christian welcome to their City and the editors of several of the leading nowspapers also seconded our efforts in such a manhor that we had unusually large audiences. The cause is gaining ground everywhere, but we must remember that the cause of sin and Salan never tires, never languishes, is never allowed to die out want of effort, energy, zeal, money and means on the part of the agents of the Evil One! Brother Beckett of the faithful Canada Temperance Advocate informed me this morning that although now published for 24 years, the Audvocate has not yet paid ox penses! Brother Becket! has to make good the loss from his own pocket, while the whole community reap the benefit of his feithful labors to stom the tide of crime taxation and misory that flows from the use of and traffic in al he in Canada. A MOST SCIENTIFIC INVENTION An instrument for the cure of general Debilty, or more properly known as Seminal Weakness, Nervous Debility, Low Spirits, Lassitude, Weakness of the Back and Limbs, Dimness of Vision, &c., &., incapacitating its victira for business, or matrimony, rendering him misanthropical and suicidal in his propensities, is instantly arrested, and permanently cured in from lifteen to twenty days by the use of this Instrument, when used conjointly with medicines. TAKE PARTICULAR NOTICE.

Da. Amus & Sox, in order to satisfy the most skeptical as to the merits of this Instrument, pledge themselves that in any instance where they may prove unsatisfactory after a fair trial, the money will be refunded by returning the Instrument in good order.

Persons wishing the above useful Instrument will observe that the price, with the accompanying directions, securely packed, and sent by express, is ten dollars.

NEW REMEDIES & QUICK CURES, Dr. Amus & Son are the only Physicians in the State who are members of the Royal College of Surgeons, London, graduates of one of the most eminent Colleges in the United States. May be consulted from eight o'clock in the morning until nine at night in every stage, and symptom of the Venereal Disease. The treatment they adopt is the result of upwards ofthirty years' extensive and successful practice in London. The most inveterate cases of Venereal Diseases eradicated in eight or nine days, and cases of a slight nature in two or three days, at a moderate expense. The core effected without confinement or hindrance from business; also, nodes, and pains in the bones and limbs,
